

LEMBAR KERJA SISWA (WORKSHEET)

Topic: Report Text & Passive Voice

PART 1: Reading Comprehension

Read the text below and answer the questions.

The Giant Panda

The giant panda (*Ailuropoda melanoleuca*) is a rare mammal native to the mountainous regions of central China. It is widely recognized for its distinctive black-and-white fur and gentle behavior. Giant pandas mainly inhabit bamboo forests at elevations between 1,200 and 3,500 meters above sea level. Although they belong to the order Carnivora, their diet consists almost entirely of bamboo. Due to habitat destruction and low birth rates, giant pandas were once considered highly endangered animals.

Physically, giant pandas have thick fur that protects them from the cold mountain climate. Adult pandas can grow up to 1.5 meters in length and weigh around 100 to 150 kilograms. Their powerful jaws and strong teeth are specially adapted for crushing bamboo stalks. In addition, pandas possess an enlarged wrist bone that functions like a thumb, allowing them to grasp bamboo efficiently. Their eyesight is relatively poor, but they have an excellent sense of smell that helps them locate food and detect danger.

Giant pandas spend most of their day eating and resting. Because bamboo contains very little nutrition, pandas must consume large quantities of it every day to survive. An adult panda may eat up to 38 kilograms of bamboo daily. They usually feed alone and communicate through vocal sounds and scent markings. Unlike many other bears, giant pandas do not hibernate during winter because bamboo remains available throughout the year.

Today, giant pandas are protected by strict conservation programs. Large nature reserves have been established in China to preserve their habitat. Furthermore, breeding programs are conducted to increase panda populations both in captivity and in the wild. Although their status has improved in recent years, giant pandas still face threats from climate change, forest fragmentation, and human activities. International organizations continue to work together to ensure the survival of this iconic species.

Questions

1. What is the scientific name of the giant panda?
 2. Where do giant pandas naturally live?
 3. Why do giant pandas need to eat large amounts of bamboo every day?
 4. What special body part helps pandas grasp bamboo?
 5. How much bamboo can an adult panda consume daily?
 6. "Conservation programs protect giant pandas."
Change this sentence into passive voice.
 7. Mention two threats faced by giant pandas today.
 8. What is the purpose of the first paragraph in the report text?
 9. Identify three action verbs used in the third paragraph.
 10. "Large nature reserves are established in China."
Change this sentence into active voice.
 11. Analyze how the panda's physical adaptations help it survive in mountain forests.
 12. Compare the feeding habits of a giant panda and a lion. How are they different?
 13. Explain why conserving giant pandas is important for the environment.
 14. Evaluate the impact of habitat destruction on giant panda populations.
 15. If bamboo forests disappeared completely, what would likely happen to giant pandas?
-

PART 2: Passive Voice Transformation (20 Soal)

Change the following active sentences into passive forms
(Simple Present: is/am/are + V3).

1. Farmers grow rice in many Asian countries.
2. Scientists study marine ecosystems carefully.
3. The company produces electric vehicles efficiently.
4. Students use computers during online classes.
5. Tourists visit ancient temples every year.
6. Birds build nests in tall trees.
7. The police protect the citizens from crime.
8. People recycle plastic bottles in this city.
9. Teachers explain grammar lessons clearly.
10. Workers clean the streets every morning.
11. Engineers develop new smartphone technology.
12. Hospitals provide medical services for patients.
13. The factory exports furniture overseas.
14. The students complete the assignment on time.

15. Lightning strikes tall buildings during storms.
 16. Artists create beautiful paintings.
 17. The zookeeper feeds the animals twice a day.
 18. Companies advertise products on social media.
 19. Researchers discover new species in the rainforest.
 20. Volunteers plant trees along the river.
-

PART 3: Error Correction (10 Soal)

Identify the mistake in the passive voice structure and rewrite the correct sentence.

1. The homework are checked by the teacher.
 2. Fresh vegetables is sold at the market.
 3. English are spoken in many countries.
 4. The window is broke by the strong wind.
 5. The letters is delivered every afternoon.
 6. Fish are caught by the fishermen daily.
 7. The museum are visited by many tourists.
 8. The books is arranged neatly on the shelf.
 9. Chocolate are made from cocoa beans.
 10. The road is repair by the construction workers.
-

PART 4: Passive Voice in Context (10 Soal)

Complete the sentences with the correct passive form (am/is/are + V3).

1. Tea _____ (drink) in many countries around the world.
2. New buildings _____ (construct) near the city center.
3. The homework _____ (submit) online every Friday.
4. Rice _____ (grow) in fertile areas.
5. Many famous songs _____ (sing) by professional artists.
6. The classroom _____ (decorate) for the school festival.
7. Mobile phones _____ (use) for communication.
8. The patients _____ (examine) by the doctor carefully.
9. Traditional dances _____ (perform) during cultural events.
10. Clean water _____ (supply) to the villagers regularly.

PART 5: Multiple Choice (Pilihan Ganda)

Choose the best answer.

51. "The giant panda's habitat ... by conservation organizations."
- a. protect
 - b. protects
 - c. is protected
 - d. are protecting
52. "Bamboo forests ... as the natural habitat of giant pandas."
- a. know
 - b. is known
 - c. are known
 - d. are know
53. Which sentence is written correctly in passive voice?
- a. Bamboo eats the panda every day.
 - b. The panda is fed with bamboo.
 - c. The panda feeding bamboo daily.
 - d. Bamboo was green in the forest.
54. In report texts, passive voice is commonly used because ...
- a. the writer wants to describe scientific facts objectively.
 - b. the writer focuses on personal feelings and emotions.
 - c. the text mainly tells fictional stories and legends.
 - d. the writer explains future plans and predictions.
